1. Aims and Objectives (Statement of Intent)

- 1.1 The school's Governing Body and Senior Management Team (SMT) recognise and accept their responsibilities for health and safety under civil and criminal law and also under the Services to People's directorate scheme of delegation, for local management of schools.
- 1.2 As responsible employers and/or persons in control of premises, the requirement to provide, so far as is reasonably practicable, a safe and healthy working environment for all employees, visitors and pupils is acknowledged.
- 1.3 In doing so, the school will expect all staff, parents, pupils and visitors to respect and abide by the requirements of this policy.
- 1.4 In compliance with the Health and Safety at Work etc. Act 1974, the school's Governing Body will ensure so far as is reasonably practicable that:
 - The premises are maintained in a safe condition.
 - Safe access to and egress from the premises is sustained.
 - All plant and equipment are safe to use.
 - Appropriate safe systems of work exist and are followed.
 - Sufficient information, instruction, training and supervision are provided.
 - Accidents and work-related illnesses are prevented where possible.
 - The school complies with all appropriate statutory requirements.
 - All risks are minimised via robust risk assessments and policies.
 - Policies are reviewed regularly to ensure effectiveness.
 - High targets and objectives are set to develop the school's culture of continuous improvement.
 - Adequate welfare facilities are available throughout the school.
 - Adequate resources are available to address health and safety issues, so far as is reasonably practicable.
 - Consultation with employee representatives will be held as and when appropriate on all matters affecting the health and/or safety of employees.

Review

The Head Teacher/individual with delegated responsibility for health and safety will undertake the necessary arrangements for procedures to be examined and workplaces to be inspected, to ensure that precautions remain suitable and sufficient, by conducting a whole school Annual Risk Assessment and Safety Review. Feedback from this process will be referred to the Governing Body.

Governors are required to take steps to ensure that they are kept informed of Stockport Metropolitan Borough Council's advice and guidance on health and safety matters.

Health and Safety is a fixed agenda item on the termly meeting of the Resources Governing Board Committee.

The School must review the Health and Safety Policy annually.

Staff will be consulted via staff briefings, e-mail updates and through a Health and Safety checklist. Once completed the policy is e-mailed to all staff to be read. A hard copy is available on the staffroom notice board. In addition to this, a Health and Safety checklist is given to all staff as part of the induction process. The document details Health and Safety procedure at Ladybridge Primary School.

Date:

Head Teacher

Chair of Governors

2. Legal Framework

2.1 The law requires all employees to:

- Take reasonable care of their own health and safety and that of others who may be affected by what they do at work
- Co-operate with their employers on health and safety matters
- Do their work in accordance with training and instructions
- Inform the employer of any work situation representing a serious and immediate danger, so that remedial action can be taken
- Follow health and safety procedures put in place by their employer.

2.2 Teachers and other staff in schools have a common law duty when in charge of pupils to take the same care of them as they would as a parent.

This policy has due regard to all relevant legislation including, but not limited to, the following:

- Health and Safety at Work etc. Act 1974:
<https://www.legislation.gov.uk/ukpga/1974/37/contents>
- The Workplace (Health, Safety and Welfare) Regulations 1992:
<https://www.legislation.gov.uk/uksi/1992/3004/contents/made>
- The Management of Health and Safety at Work Regulations 1999:
<https://www.legislation.gov.uk/uksi/1999/3242/contents/made>
- The Control of Substances Hazardous to Health Regulations 2002:
<https://www.hse.gov.uk/nanotechnology/coshh.htm>
- The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013:
<https://www.legislation.gov.uk/uksi/2013/1471/contents/made>
- The Construction (Design and Management) Regulations 2015:
<https://www.hse.gov.uk/construction/cdm/2015/index.htm>
- The Personal Protective Equipment at Work Regulations 1992:
<https://www.legislation.gov.uk/uksi/1992/2966/contents/made>
- The Education (School Premises) Regulations 1999:
<https://www.legislation.gov.uk/uksi/1999/2/contents/made>
- The Ionising Radiation Regulations 2017 (IRR17):
<https://www.legislation.gov.uk/uksi/2017/1075/contents/made>
- The Food Information (Amendment) (England) Regulations 2019 (Natasha's Law):
<https://www.legislation.gov.uk/uksi/2019/1218/made>

This policy has due regard to national guidance including, but not limited to, the following:

- DfE (2021) 'Health and safety: responsibilities and duties for schools':
<https://www.gov.uk/government/publications/health-and-safety-advice-for-schools/responsibilities-and-duties-for-schools>
- DfE (2017) 'Safe storage and disposal of hazardous materials and chemicals':
<https://www.gov.uk/government/publications/storing-and-disposing-of-hazardous-chemicals-in-schools>
- HSE (2014) 'Sensible health and safety management in schools':
<https://www.hse.gov.uk/services/education/sensible-leadership/index.htm>

The Health and Safety at Work etc. Act 1974 determines British health and safety law. The Health and Safety Executive (HSE), with local authorities, enforce this Act.

The Management of Health and Safety at Work Regulations 1999 supports the Act. Schools should make sure they are familiar with both of these documents.

3. Scope

- 3.1 The policy applies to all schools with the Metropolitan Borough who buy back the Health and Safety Package from the Local Authority.
- 3.2 It is important to remember that all staff have three basic rights:
- ✓ The right to know about health and safety matters.
 - ✓ The right to participate in decisions that could affect their health and safety.
 - ✓ The right to refuse work that could affect their health and safety and that of others

4. Who Does What (Roles and Responsibilities)

- 4.1 This section outlines who is responsible for what and delegates tasks and duties in a hierarchical fashion.

The Ladybridge Primary School Governing Body

The Governing Body are responsible for health and safety matters at a local level including but not restricted to:

- Ensuring adherence to the local authority health and safety policy, procedures and standards.
- Formulating a health and safety statement detailing the responsibilities for ensuring health and safety within the establishment.
- Reviewing the establishment's health and safety policy annually and implementing new arrangements where necessary.
- Monitoring, reviewing and evaluating the school's health and safety performance.
- Providing appropriate resources within the establishment's budget to meet statutory requirements and the local authority health and safety policy, procedures and standards.

- Receiving from the Head Teacher or other nominated member of staff reports on health and safety matters and reporting to (the local authority, or other body as necessary), any hazards that the establishment is unable to rectify from its own budget.
- Seeking specialist advice on health and safety that the establishment may not feel competent to deal with.
- Promoting a positive health and safety culture and high standards of health and safety within the establishment via the nomination of a named health and safety governor.
- Ensuring that when awarding contracts health and safety is included in specifications and contract conditions and takes account of local authority policy and procedures.

Nominated Governor: Stacey Bramhall

The Headteacher: Emma Hill

Overall responsibility for the day-to-day management of health and safety in accordance with the Local Authority's health and safety policy and procedures rests with the Head Teacher.

As manager of the establishment and of all the activities carried on within it, the Head will advise Governors of the areas of health and safety concern which may need to be addressed by the allocation of funds.

The Head Teacher has responsibility for:

- Co-operating with the Local Authority and governing body to enable health and safety policy and procedures to be implemented and complied with.
- Ensuring effective health and safety management arrangements are in place for carrying out regular inspections and risk assessments, implementing actions and submitting inspection reports to the governing body and Local Authority where necessary.
- Communicating the policy and other appropriate health and safety information to all relevant people including contractors.
- Carrying out health and safety investigations.
- Ensuring all staff are competent to carry out their roles and are provided with adequate information, instruction, and training.
- Ensuring consultation arrangements are in place for staff and their trade union representatives (where appointed) and recognising the right of trade unions in the workplace to require a health and safety committee to be set up.
- Reporting to the Local Authority any hazards which cannot be rectified within the establishment's budget.
- Ensuring that the premises, plant, and equipment are maintained in a serviceable condition.
- Monitoring purchasing and contracting procedures to ensure compliance with local authority policy.

The Head Teacher may choose to delegate certain tasks to other members of staff. It is clearly understood by everyone concerned that the delegation of certain duties will not relieve the Head Teacher from the overall day to day responsibilities for health and safety within the establishment.

The task of managing health and safety on the site has been delegated by the Head to: The School Business Manager, Katherine Dumenil.

Responsibilities of the School Business Manger include, but are not limited to the following:

- Attend Senior Management/Leadership Team, full Governing Body and appropriate Governors' sub-committee meetings relating to Health, Safety and Wellbeing
- Negotiate and influence strategic decision making within the school's Senior Management/Leadership Team relating to Health, Safety and Wellbeing
- In the absence of the Head Teacher, take delegated responsibility for Health and Safety related decisions
- Monitor the relevant legal, regulatory, ethical and social requirements and the effect they have on your school and staff
- Ensure people have a clear understanding of the policies and procedures and the importance of putting them into practice
- Monitor the way policies and procedures are actioned and provide support where necessary
- Ensure the supervision of relevant planning and construction processes is undertaken in line with contractual obligations
- Ensure the safe maintenance and security operation of all school premises
- Manage the maintenance of the school site including the purchase and repair of all furniture and fittings
- Ensure the continuing availability of utilities, site services and equipment
- Follow sound practices in estate management and grounds maintenance
- Monitor, assess and review contractual obligations for outsourced school services
- Ensure a safe environment for the stakeholders of the school to provide a secure environment in which due learning processes can be provided
- Ensure ancillary services e.g., catering, cleaning, etc., are monitored and managed effectively
- Manage the letting of school premises to external organisations, for the development of the extended services and local community requirements.
- Seek professional advice on insurance and advise the SMT on appropriate insurances for the school and implement and manage such schemes accordingly..
- Plan, instigate and maintain records of fire practices and alarm tests.
- Ensure the school's written health & safety policy statement is clearly communicated and available to all stakeholders
- Ensure the health & safety policy is implemented at all times, put into practice and is subject to review and assessment at regular intervals or as situations change
- Enable regular consultation with stakeholders on health and safety issues
- Ensure systems are in place to enable the identification of hazards and risk Assessments
- Ensure systems are in place for effective monitoring, measuring and reporting of health and safety issues to the Senior Team, and Governors Executive
- Ensure the maximum level of security consistent with the ethos of the school

- Oversee statutory obligations are being met for pupils with special educational needs, ensuring that financial and supporting agency services are adequate for their diverse needs

The task of overseeing health and safety on the site has been delegated by the Head to: The Site Manager, Jackie

Responsibilities of the Site Supervisor include, but are not limited to the following:

- To clean designated areas in accordance with the Authority's approved methods, frequencies and standards.
- To assist the Headteacher in monitoring the cleaning standards achieved by outside contractors on site.
- To ensure that the premises are kept secure and safe, including locking & unlocking buildings,
- Ensure the building alarm is activated & deactivated & premises are secured.
- Undertake handyman duties as appropriate.
- Undertake portage duties.
- To assist the Headteacher in the organisation and arrangement of lettings.
- Deal with members of the public on site during lettings.
- Undertake regular inspections of the premises to determine the need for repair and maintenance work.
- Keep appropriate documentation and records of repairs.
- Monitor the effectiveness of, and ensure the maintenance of, all heating and service installations.
- Ensure that the grounds maintenance works are fully completed, and records kept up to date.
- Ensure that the school grounds are free from litter.
- Monitor the condition of the school fences and gateways and to take appropriate action, with the SBM/Headteacher's approval, to repair and improve the perimeters.
- Monitor the fuel used in the school buildings.
- Ensure that all energy bills are correct in accordance with the readings kept at the school.
- Use equipment, machinery and cleaning materials as directed and to ensure that such equipment is satisfactorily maintained.
- Ensure that accidents at work and defects of equipment and machinery are reported to the appropriate sources.
- Undertake administrative/clerical duties connected with the caretaking and cleaning service i.e., order forms, stock returns, work orders, time sheets etc.

Responsibilities of all other Teaching Staff/Non-Teaching Staff:

- Apply the school's health and safety policy to their own department or area of work and be directly responsible to the Head Teacher for the application of the health and safety procedures and arrangements.
- Maintain or have access to an up-to-date library of relevant published health and safety guidance from sources including CLEAPSS, AfPE etc., and ensure that all subordinate staff are aware of and make use of such guidance.

- Ensure regular health and safety risk assessments are undertaken for the activities for which they are responsible and that control measures are implemented and regularly reviewed.
- Ensure that appropriate safe working procedures are brought to the attention of all staff under their control.
- Carry out regular inspections of their areas of responsibility to ensure that equipment, furniture, and activities are safe and record these inspections where required.
- Ensure, as far as is reasonably practicable, the provision of sufficient information, instruction, training, and supervision to enable other employees and pupils to avoid hazards and contribute positively to their own health and safety.
- Ensure that all accidents (including near misses) occurring within their department are promptly reported and investigated using the appropriate forms etc.
- Arrange for the repair, replacement, or removal of any item of furniture or equipment which has been identified as unsafe.

Responsibilities of all other Employees:

Under the Health and Safety at work etc. Act 1974 all employees have general health and safety responsibilities. Staff must be aware that they are obliged to take care of their own health and safety whilst at work along with that of others who may be affected by their actions.

All employees have responsibility to:

- Take reasonable care for the health and safety of themselves and others in undertaking their work.
- Comply with the school's health and safety policy and procedures at all times.
- Report all accidents and incidents in line with the school's reporting procedure.
- Co-operate with school management on all matters relating to health and safety.
- Not to intentionally interfere with or misuse any equipment or fittings provided in the interests of health, safety and welfare.
- Report all defects in condition of premises or equipment and any health and safety concerns immediately to their Line Manager.
- Report immediately to their Line Manager any shortcomings in the arrangements for health and safety.
- Ensure that they only use equipment or machinery for the purpose that it is intended and that they are competent/have been trained to use.
- Make use of all necessary control measures and personal protective equipment provided for safety or health reasons.

5. How Risks are Managed (Arrangements)

This section outlines the arrangements the school has for the completion of risk assessments and the practical control measures that are in place to reduce risk to all those present on site at a school at any given time. These measures form part of the Occupational Health, Safety and Welfare Management System (OHSWMS) that is audited on an annual basis, or as and when necessary, by the Local Authority.

Risk assessments consider what measures you need to protect the health and safety of all; staff; pupils; visitors and contractors

Schools will need to think about the risks that may arise in the course of the school day. This could include anything related to the operation of the school premises or delivery of the school curriculum, whether this is on or off site.

Factors included in risk assessments will vary between schools, although some will appear in most schools. The HSE provides guidance on the risk assessment process and Coronavirus: latest information and advice can be found at:

- Health and Safety Executive-Guidance-Industries-Public services-Education:
<https://www.hse.gov.uk/services/education/>

5.1 Accident and RIDDOR Reporting Procedure

The school reports in accordance with the Local Authorities accident/incident reporting procedure, which requires employees to report accidents, violent incidents, dangerous occurrences, and near misses using the online reporting system.

- Interactive Stockport.gov.uk:
<http://interactive.stockport.gov.uk/olf/AccidentsandIncidents/01-What.aspx>

School accident reports are monitored for trends on a termly and annual basis and a report made to the Governors at the next scheduled meeting.

The Head Teacher, or their nominee, investigates accidents and takes remedial steps to avoid similar instances recurring.

Any accidents reportable to the HSE under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1995 (RIDDOR) will be investigated by the SMBC Health Safety and Wellbeing Team because this responsibility is delegated to them through the school's H&S SLA. Please call the team on 0161 474 3056 for assistance.

Responsibility for accident/near miss reporting is with: **Katherine Dumenil**

5.2 Breakfast Clubs

For schools that run or host breakfast clubs there is guidance available regarding hygiene and the national school breakfast club programme run by the Government and also some helpful FAQ's.

SLA Navigation: Breakfast Clubs

➤ FAQ's for Breakfast Clubs: https://schoolleaders.thekeysupport.com/pupils-and-parents/extended-services/breakfast-clubs-faqs/

5.3 Buildings and Facilities

Schools are required to follow The School Premises (England) Regulations 2012 and meet compliance standards as outlined by the Department for Education (DfE). Safeguarding pupils is also very important, making the need for safe and secure buildings a high priority.

Studies show that safe, well-maintained school buildings that are free from disruption can increase teaching time and reduce rates of teacher turnover by 25%. In 2019, a teacher wellbeing survey by Ofsted highlighted how a lack of physical resources—including computers and audio-visual resources—restricted a teacher’s instructional ability. Lack of resources may also contribute to low levels of occupational well-being for teachers.

To be effective, school facilities management requires a nominated individual to co-ordinate activity, implement processes, and use software solutions to support them.

Ladybridge Primary School are implementing <https://safesmart.co.uk/> to support this process.

Strategic estate management is the activity that seeks to make sure the land and buildings in a school estate support the responsible body’s overall education goals and objectives over time. It is a whole organisation activity - to be effective it must be fully coordinated and integrated with the organisation’s business planning processes.

Good strategic estate management will help your school be:

1. Safe	Poorly maintained schools are likely to be more hazardous.
2. Successful	Ensuring that facilities are designed well for delivering the curriculum and avoiding poor physical environments can be linked with levels of attainment.
3. Financially sustainable	An effectively managed estate will minimise surplus provision, minimise revenue costs, optimise revenue generation, prioritise investment and maintain asset value.
4. Efficient	Repairs, maintenance and works to schools can be planned, minimising emergency works and preventing failures and loss of facilities. Planned works will be less costly than emergency works.
5. Appealing	A well-maintained school will help create a positive impression and attract pupils.

<ul style="list-style-type: none">➤ Managing Risks in Schools: https://www.hse.gov.uk/services/education/index.htm➤ School Maintenance and Construction Work: https://neu.org.uk/advice/school-maintenance-and-construction-work

5.4 Child Injury Prevention

The Child Accident Prevention Trust (CAPT) provides an excellent repository of resources, materials and guidance a link to their website appears below.

Child Safety Week is an annual community education campaign run by (CAPT), acting as a catalyst for thousands of safety conversations and activities UK-wide. They help families build confidence and skills in managing the real risks to children's safety. They want all children to have the freedom to grow and learn, safe from serious harm.

Other Resources: Child Injury Prevention
<ul style="list-style-type: none">➤ Child Accident Prevention Trust: https://www.capt.org.uk/Pages/Category/who-we-are➤ Keeping children safe in education: https://www.gov.uk/government/publications/keeping-children-safe-in-education--2➤ Safeguarding in schools: https://learning.nspcc.org.uk/safeguarding-child-protection-schools

5.5 Competent Person(s)

Schools must appoint a competent person to ensure they meet their health and safety duties. A competent person is someone with the necessary skills, knowledge and experience to give sensible guidance about managing the health and safety risks at the school.

This can be someone appointed directly by the school, or the employer can arrange support from outside the school. If the school chooses not to use the Council's health and safety SLA, they must appoint a 'competent person' to provide 'health and safety assistance' in accordance with Regulation 7 of the Management of Health & Safety at Work Regulations 1999.

The school gets their competent health and safety advice from:
Jonathan Beck; Council's health and safety SLA

Other Resources: Competent Person(s)
<ul style="list-style-type: none">➤ Advice from the Health and Safety Executive: https://www.hse.gov.uk/services/education/faqs.htm

5.6 Control of Substances Hazardous to Health (COSHH)

All substances which may be considered hazardous to health must have been assessed (except in Science – these are covered by CLEAPSS hazards).

A copy of the health and safety data sheet and COSHH assessment will be available in the location where the chemicals are used/stored.

Any person using these chemicals must ensure they have seen and follow the information given on the COSHH assessment (including the wearing of any identified PPE).

Staff must not bring any hazardous chemical onto the school site unless prior permission has been sought and a COSHH assessment has been completed.

➤ A step by step guide to COSHH assessment [hsg97]: https://www.hse.gov.uk/pubns/priced/hsg97.pdf

5.7 Display Screen Equipment (DSE)

It is the school's duty as outlined in the Health and Safety (Display Screen Equipment) Regulations as amended by the Health and Safety (Miscellaneous Amendments) Regulations 2002, to identify if employees would be classed as DSE Users, and assess their needs appropriately.

The definition of a DSE user is:

'An employee who habitually uses DSE for a significant part of their working day'

The school adopts and follows SMBC's DSE Guidance taken from the staff handbook (January 2019) section 15.4 which is reproduced below:

"Employees who use a computer or other Display Screen Equipment for a significant part of their working day are entitled to an eyesight test to be carried out by a qualified Optician.

The Council will pay for the cost of eyesight tests and the provision of glasses up to but not exceeding the current amount set out in the Pay, Additional Payments and Allowances policy, which says that for a "Subsidy for corrective glasses (Display Screen Use) An allowance of £62.94 will be made to employees who need corrective glasses to comply with Display Screen Equipment (DSE) Regulations. In order to process any claim for reimbursement for these, the prescription detailing exclusive VDU use must be provided on application to your Manager to check criteria and must be kept for 6 years after application. Claims for reimbursement can only be processed if made on iTrent employee self-service and must be claimed within 6 months of the test. Only one claim within any 2-year period can be made. However, if employees are experiencing problems associated with VDU or DSE use then you should contact HR for advice.

If an employee enters into a period of notice, the Council will not reimburse for eye tests or prescriptions for glasses.

All school staff who habitually use computers as a significant part of their normal work (seated at a workstation with continuous or near continuous spells of an hour will be asked to complete a DSE Self-Assessment.

5.8 Electrical Safety (Including PAT)

Arrangements are in place for the testing of fixed wiring and fixed appliances by competent electrical engineers.

What the School Must Do:

- When purchasing equipment, ensure that it is suitable for intended use and built to a relevant British Standard
- Establish a system for correctly wiring and fusing new appliances before use
- Ensure sufficient sockets are available before purchasing extra electrical equipment
- Ensure that no portable electrical equipment is brought onto premises and used unless it has been inspected by a competent person
- Consider other means of reducing risk e.g., low voltage equipment, RCDs. (circuit breakers)
- Ensure that a system is in place to ensure regular inspection and testing of high-risk portable electrical equipment annually and the fixed installation equipment every 5 years by a competent person. [See SMBC guidance for more details]
- Ensure that a system is in place for reporting faulty electrical equipment
- Ensure systems exist to withdraw all faulty equipment from service until repaired by a competent person
- Monitor arrangements, follow-up action and risk assessment according to results
- Ensure all contractors working with electricity are competent.
- Keep records of maintenance throughout the life of the system/equipment

In order to reduce the risk, Portable Appliance Testing (PAT) should be standard practice when:

- There is reason to suppose the equipment may be defective, but this cannot be confirmed by visual inspection.
- Any repair, modification or similar work has been done to the equipment;
- An interval has elapsed appropriate to the equipment, the manner and frequency of use and the environment

Those who wish to undertake electrical testing work would normally be expected to have more knowledge and to be able to demonstrate competence through the successful completion of a suitable training course. A member of staff can do this if they have had suitable training. Greater knowledge and experience are needed than for inspection alone, and they need to have the right equipment to do the tests.

They should know how to use the equipment correctly and how to interpret the results. Where testing is done by a contractor invited to a site, safe working arrangements must be discussed and agreed before the work starts. This enables everyone concerned to know who is doing what and who is responsible for what, so that the work can be done safely and without risk to the contractor's employees, the site employees and others who might be affected.

➤ Maintaining portable electric equipment in low-risk environments https://www.hse.gov.uk/pubns/indg236.pdf
➤ Electrical Safety in Schools https://www.hse.gov.uk/toolbox/electrical.htm

5.9 Fire Safety (Including PEEPS)

The school will ensure that a fire evacuation drill is completed at least once per term and will record the date, time taken to evacuate and any other relevant details in the fire logbook.

The fire logbook will be kept up to date with entries for weekly fire alarm checks and fire door (means of escape) checks, monthly emergency lighting checks and fire extinguisher checks and any contractor visits or false alarms.

Arrangements are in place for evacuating disabled people via Personal Emergency Evacuation Plans (PEEP).

The Headteacher and Governors will ensure a school Fire Risk Assessment is completed and reviewed at least annually by the competent person at the school and a full Fire Risk Assessment (FRA) by an external professional is completed every 4 to 5 years.

There are no specific time periods in law for how often fire risk assessments must be carried out or reviewed. The law simply says that the person responsible for the assessment in your building must review it 'regularly' to make sure it's up to date.

The responsible person must review the fire risk assessment if:

- there's reason to think it's no longer valid (for example, if there has been a fire in the building)

- there have been significant changes since the assessment was done (for example, major building works or more people using the building)

All staff are responsible for ensuring that pupils and visitors evacuate in an orderly and timely fashion in the event of the alarm sounding.

All staff are responsible for ensuring evacuation routes and doors are kept clear at all times.

5.10 First Aid

There are no hard and fast rules on exact numbers of first aiders required in any given school. Headteachers have to make a judgement based on their own circumstances and a suitable and sufficient risk assessment. Governing bodies/Headteachers should consider the likely risks to pupils and visitors, as well as employees,

The HSC provide guidance on numbers of first-aid personnel based on employee numbers. As a general guide, they recommend that: a lower risk place of work (e.g. shops, offices, libraries), with fifty to one hundred employees, should consider having at least one first aider;

Schools will generally fall into the lower risk category, but some schools or areas of activity may fall into the medium risk category. Schools should base their provision on the results of their risk assessment. If there are parts of the school where different levels of risk can be identified, the schools should consider the need to make different levels of provision in different areas/departments. When considering how many first-aid personnel are required, the Governing body/Headteacher should also consider the information contained in the DfE document highlighted in the reference section below.

Up to date lists of all first aiders are displayed **Staff room**.

The appointed first aiders are: **Janet Chantler (all staff trained)**

First aid kits are located; staff room, school office, every classroom.

Portable kits are made available to staff for off-site trips and visits.

5.11 Health and Safety Audits and Inspections

Regular visual inspections of the site and installations, where defects are identified and recorded are carried out by the Site Supervisor. We recommend that this kind of safety tour be completed every month as part of best practice.

A documented facilities and health and safety inspection of the site be carried out termly by the School Business Manager, Site Manager, and Health and Safety Governor.

The Headteacher with the Health and Safety Governor will undertake an inspection of the premises and safety management systems on an annual basis and report to both the relevant sub-committee and full governing body meetings.

As part of the Health, Safety, and Wellbeing team service level agreement an annual Audit and Inspection of the site is undertaken.

5.15 Lockdown and Invacuation

Those with responsibility for schools and colleges are advised to consider the threat from a broad range of terrorist methodologies. Such methodologies may include Vehicle as a Weapon, Marauding Attacks with either bladed weapons or firearms and improvised explosive devices etc. Planning your emergency response should such an incident occur would likely require a range of emergency responses, including a consideration of emergency evacuation, “invacuation” (inward evacuation) & lockdown procedures, alongside the use of protected spaces.

Although most people use the term ‘lockdown’ to refer to getting everyone into a safe place and sealing the exits, it is actually one element of a wider practice known as ‘invacuation’. **Invacuation** is the process of getting everybody inside and safe and securing the building.

In most cases, pupils will be able to stay in their classroom during an invacuation, and the school day can continue as normal, just with everyone staying indoors.

Lockdown goes a step further, in that everyone on the premises – staff, pupils and visitors – are moved away from the potential danger to a place where they cannot be seen from outside the building.

Lockdown is only used in extreme circumstances where there is a serious and current threat to the safety of those in the building and/or facilities.

Invacuation might be required if:

- There is local air pollution due to a nearby fire or chemical release.
- There is a fierce dog or wild animal on the grounds.
- There is an incident or civil disturbance in the area that might affect the school.

Lockdown might be implemented if:

- There is an aggrieved, deranged, or intoxicated person trying to gain access to the school (this could be a parent or a stranger).
- There is an intruder on the site.
- There is an internal threat from a student.

Invacuation or lockdown could be triggered if there is an urgent imminent threat, or as a precaution because of a threat in the vicinity.

Legislation requires schools to take appropriate measures to keep users of school sites safe.

The complexity of the Lockdown plan will depend on the school’s perception of risk: for instance, inner city schools and faith schools may feel more under threat than a small rural school.

Invacuation

In most schools, an invacuation will take the following shape:

1. A clear signal should be given that pupils, staff, and visitors can identify as an invacuation signal.
2. If pupils are outside, staff should immediately take them to the nearest safe area inside the building.
3. All external doors and windows should be shut and locked as necessary.
4. The register is taken to ensure all children are accounted for.

5. The staff member in charge of taking the register must notify the office if any children are unaccounted for.
6. Everyone should remain where they are until the all clear is given.

Lockdown

Schools should identify suitable lockdown areas to be used in serious incidents. A lockdown area should be large enough to accommodate the likely number of people who would need to use it.

Ideally, a lockdown area should also:

- Have a separate means of escape.
- Have no windows or doors directly to the outside.
- Have a lockable door.

The steps taken will be the same as during an invacuation, but there should be an additional signal that lets people know the school is in lockdown. The doors and windows must be shut and locked, and blinds or curtains should be drawn. Depending on the nature of the threat, children may be told to hide under their tables.

Schools should identify a staff member who will be responsible for supervising each lockdown area.

Schools should practise invacuation procedures with pupils, in the same way and with the same frequency that they hold fire drills.

Schools must take care not to frighten pupils and clear, strong communications are required to ensure that children know that practices are for the purpose of preparing them for the “real thing”, without introducing a fear factor. The more lockdowns are practised the less fearful pupils become.

5.21 Off-site Visits - New Procedure for Trips/Visits from April 1, 2021

The trips and visits element of the Head Teacher Support SLA has moved to the Health & Safety Team.

We have reviewed the process and updated the procedure. The new procedure is a more streamlined process using an on-line form to notify the team of a school's intention to undertake a trip. You will no longer be required to send the OSVF form or the names of pupils and staff attending the trip.

The link to the on-line form will be hosted on both office online and SLA on-line. We have also provided a toolkit to help you navigate the new procedure.

Once you complete the on-line form, you will receive an e-mail to confirm its receipt and reference number. For trips and visits that fall in either category 3 or 4 you will then be required to send your risk assessment to the Health and Safety team, who will review and advise the visit leader of any changes or additions required.

Please ensure that you use the up-to-date risk assessment template available on SLA online and described below.

We have provided a toolkit to guide you through the new procedure. This is available via SLA-online.

EVC and visit leader training

The SMBC Workforce Development team has produced an e-learning course for Educational Visit Coordinators and Visit Leaders. This course will be accessible as part of the trips and visits package and a link will be sent to you once the school has paid for the trips and visits package.

5.22 Personal Protective Equipment

Personal Protective Equipment Regulations (PPE) 2018.

Some working environments present significant risks to employee health and safety (e.g., from falling materials, contact with hazardous substances, contaminated air, extremes of temperature, etc.). In such environments, there is a duty on the employer to provide their workers with personal protective equipment (PPE) to reduce the potential risk of harm when it cannot be reduced or mitigated by any other means (“last resort” principle).

A suitable and sufficient risk assessment must be carried out, prior to providing PPE, to determine that potential risk cannot be mitigated through other control measures.

PPE includes, but is not limited to, high-visibility clothing, protective footwear, safety helmets, eye protection, safety harnesses and even respiratory protective equipment (RPE).

The Key factors of PPE regulation are:

- Suitable provision - where it has been assessed that PPE is required, the provision of PPE must be suitable and appropriate to the work-task and its associated risk i.e., the equipment must fit the user properly and be of

proportionate size and weight for them to use it. 'The equipment must also be CE marked in accordance with the Personal Protective Equipment Regulations 2002.'

- Compatibility and effectiveness - where more than one item of equipment must be worn for any given task, the PPE items must still be effective when worn together. The wearing of one item (e.g., protective eyewear) must not cause the other item to be ill fitting, and therefore ineffective (e.g., a respirator) and vice versa.
- Maintenance and storage – PPE must be properly looked after, maintained, and stored. Reusable items must be properly cleaned and kept in good condition. If items have disposable parts (e.g., respirator filters) replacements parts must be properly compatible with the original piece of equipment.
- Considerations such as having replacement PPE available (in the event of damage or malfunction) and appointing someone to oversee how and when items are maintained are important too.
Use and training – It's the duty of the employer to ensure that employees have correct training on the use of PPE, what level of responsibility that the employee has towards the maintenance of PPE and that they are properly informed about the risks that the PPE is protecting them from. It is also the responsibility of the employer to ensure that any PPE provided is being used correctly.
- Employee responsibility – The duty of the employee is to use PPE in accordance with instruction and training. Employees also have a responsibility to report any damage, defects, or loss of equipment that they are aware of.

It should be noted that wherever PPE has been identified as being required as part of the control measure provision, then this must be provided at no cost to the employee (this includes replacement of such equipment).

5.23 Preventing Violence at Work and Personal Safety

The Health and Safety Executive (HSE) defines work-related violence as:

Any incident in which a person is abused, threatened, or assaulted in circumstances relating to their work

This can include verbal abuse or threats as well as physical attacks. The school resources explain what HSE is doing to address the issue of work-related violence and provide access to a wide range of information.

SLA Navigation: Preventing Violence at Work and Personal Safety

- Preventing Violence at Work and Personal Safety-Managing Assaults Against Staff in School and Other Educational Establishments-Children & Young People Policy

5.24 Risk Assessments

Risk assessments are completed for any significant risks in accordance with the SMBC Risk Assessment guidance. These cover curriculum-based activities in school, school visits and the running of the school building and grounds

Responsibility for ensuring risk assessments have been completed lies with the **Headteacher**.

Risk Assessments are held centrally. School Office and are available for all staff to view.

These risk assessments are working documents and will be viewed by staff carrying out the activity.

Risk Assessments will be reviewed on an annual basis or whenever there is a significant change to the activity/task /personnel or following an accident.

Specific risk assessments relating to individuals, e.g., staff member or young person/pupil are held on that person's file and will be undertaken by their line manager or teacher as required.

Please note that there is a full range of specific risk assessments available on SLA Online under Risk Assessments.

Contractor	Stage lighting and rigging & AV Systems	Annually					
Contractor	Tree inspections	Annually					

5.28 Severe Weather and Sun Safety

Under the new PHSE Curriculum which came into force in September 2020, all English primary schools must now educate pupils about safe and unsafe exposure to the sun and how to reduce the risk of sun damage, including skin cancer. Please see below revised guidance from ourselves and our Health colleagues which reflects the latest guidance. Please note that there are some changes to certain circumstances where Health and Cancer Research findings show the types of exposure and activity where the 8-hour sun creams can lose a very high percentage of their protection which may leave children vulnerable to the sun.

In such specific circumstances reapplication is recommended and this is mentioned in the primary guidance. There is often some misunderstanding around the use of sunscreen in primary schools. What is needed is a practical approach toward the application of sunscreen in schools, particularly with younger or less able children. This is why having a clear policy on the issue will help schools.

By law, schools are allowed to apply sunscreen to children. The Health and Safety Executive (HSE) states that 'health and safety legislation does not prevent school staff from applying or helping pupils apply sun cream. The Department for Education has already made clear that schools are expected to take a sensible approach to this issue.'

NICE, the National Institute for Health and Care Excellence, backs this up, identifying children as an at-risk group for sun damage. Its guidance says head teachers should take action to protect children from over-exposure to UV rays, and that schools should develop a policy to ensure they are protected as much as possible when they're outside for more than a brief period in strong sunlight. Legally, schools can, then, ask parents to supply sunscreen for use during the day and help children apply it if necessary.

5.29 Training

The Head Teacher must ensure that staff receive information and training about health and safety. This includes:

- how to assess risks specific for their job
- how to meet their roles and responsibilities identified within the health and safety policy

They can do this in different ways depending on individual or specific need. For example, providing staff with written guidance may be appropriate in some cases, while attending a training course may be more appropriate for others.

Staff whose work involves a greater element of risk will need extra or specific training. The [HSE risk management guidance](#) provides information about when staff require specific training in, for example:

- using industrial machinery
- managing asbestos
- having responsibility for the storage and accountability for potentially hazardous materials in their buildings

All members of staff, as part of their Induction to the school, will receive training on the requirements of this health and safety policy.

The Health and Safety at Work Act (HASAWA) 1974

As a brief overview, the HASAWA 1974 requires that workplaces provide:

- Adequate training of staff to ensure health and safety procedures are understood and adhered to
- Refresher training is provided as required
- Training is recorded

5.30 Work at Height

The school adopts and follows SMBC's Work at Height Guidance.

When working at height (including accessing storage or putting up displays) appropriate stepladders or kick stools are to be used. **Staff must not climb onto chairs or other furniture under any circumstances.**

Staff must not use access equipment unless appropriate training has been given.

A risk assessment must be completed for the access equipment or task, and staff using the equipment must have access to and comply with the risk assessment.

The access equipment must be visually checked before each use. An inventory is required for all access equipment, with a formal written 6-monthly check (tower scaffolds require specialist and more frequent checks).

5.31 Work Equipment

All work equipment will be purchased from a reputable supplier.

Before purchase the following considerations must be given:

- The installation requirements
- The suitability for purpose
- The positioning and or storage of the equipment
- Maintenance requirements (contracts and repairs)
- Training and use of the equipment.

Staff must not use new items of work equipment unless appropriate training has been given. A risk assessment must be completed for the work equipment, and staff using the equipment must have access to and comply with the risk assessment.

All plant and equipment requiring statutory inspection, testing and maintenance, (for example steam boilers, pressure cookers, lifting equipment, local exhaust ventilation) will be inspected by an approved contractor (if the school does not use an approved contractor, it will ensure a competent contractor is used).

Any PPE required for the use of work equipment will be supplied free of charge by the school. All employees must wear the PPE when operating such equipment.

6. Monitoring and Review of the Policy

- 6.1 This section explains how the school will establish, monitor, and review its measures to meet satisfactory health and safety standards. It will also identify methods which go beyond the satisfactory and explains how a school can enter the category of demonstrates best practice through continuous improvement.
- 6.2 All schools should regularly monitor and review their health and safety policies to ensure they are reducing risks. As part of this monitoring, schools should investigate incidents to ensure that they are taking appropriate corrective action, sharing learning and putting necessary improvements in place.
- 6.3 Generally, schools should regularly (at least annually) consider how they measure their performance. They should set up an effective monitoring system, backed up with sensible and realistic performance measures.
- 6.4 As the country learns to live with COVID-19, schools must regularly review and update risk assessments - treating them as 'dynamic documents', as the circumstances in your school and the public health advice changes.
- 6.5 Where there is a major health and safety incident at the school, the Health, Safety and Wellbeing team from SMBC will assess the effectiveness of the school's procedures and its response. They will also, make recommendations for necessary changes to policies and procedures.

7. Links with other policies and procedures

- 7.1 The health and safety policy has direct and intrinsic links to the following policies:
1. Adverse Weather Policy
 2. Bomb Threat Policy
 3. CCTV Policy
 4. Data Protection Policy
 5. LOLER Policy (Mechanical Handling)
 6. Minibus Policy
 7. School Security Policy
 8. School Uniform Policy
 9. Visitor Policy
 10. Whole-School Food Policy
